

# Juneau Species Checklist

John Scoen

## Location Description

Juneau is the capital of Alaska and the largest city in the southeast. More than 300 bird species have been found in the Juneau area. Expect to find an abundance of Common Ravens, Northwestern Crows, and Bald Eagles. On the water in spring and late summer, Surf and White-winged Scoters are common. Marbled Murrelets are often spotted offshore. Gulls, especially Glaucous-winged, Herring, Mew, and Bonaparte's, are common in the summer. The forested areas ring with the songs of Varied, Hermit and sometimes Swainson's thrushes. Other common regional songbirds include Chestnut-backed Chickadee, Pacific Wren, Oregon Junco, and Steller's Jay.

## Seasons

Spring: March–May  
 Summer: June and July  
 Fall: August–November  
 Winter: December–February

## Frequency Classification

**C** = Common: Occurs in essentially all suitable habitats during appropriate seasons, with certain species at times abundant; species should be easy to find.

**F** = Fairly common: Occurs in some or most suitable habitats during appropriate seasons, but less abundant and at times few in number; species often found.

**U** = Uncommon: Occurs in relatively small numbers; species not observed regularly even in proper habitats.

**R** = Rare: Either found in restricted habitat, or occurs most years in small numbers; species difficult to find.

**V** = Very Rare: A species beyond its normal range that may occur intermittently and in very small numbers.

**A** = Accidental: Only one or two historical records to date

**NP** = Not Present or No Records: A species is generally not present in during a specific season (due to seasonal migration) or no records exist of a species' presence in that season.

This checklist was designed by experienced ornithologists and birders to help visitors to the Southeast Alaska Birding Trail plan and enjoy their trips. This list is not a guarantee that a particular species will be present at a given location, and not all species on a community list will be present at all sites in that community. This list is for recreational use only, not for use in scientific publications, environmental impact assessments or other planning documents.
