

Wingspan

At-home activity

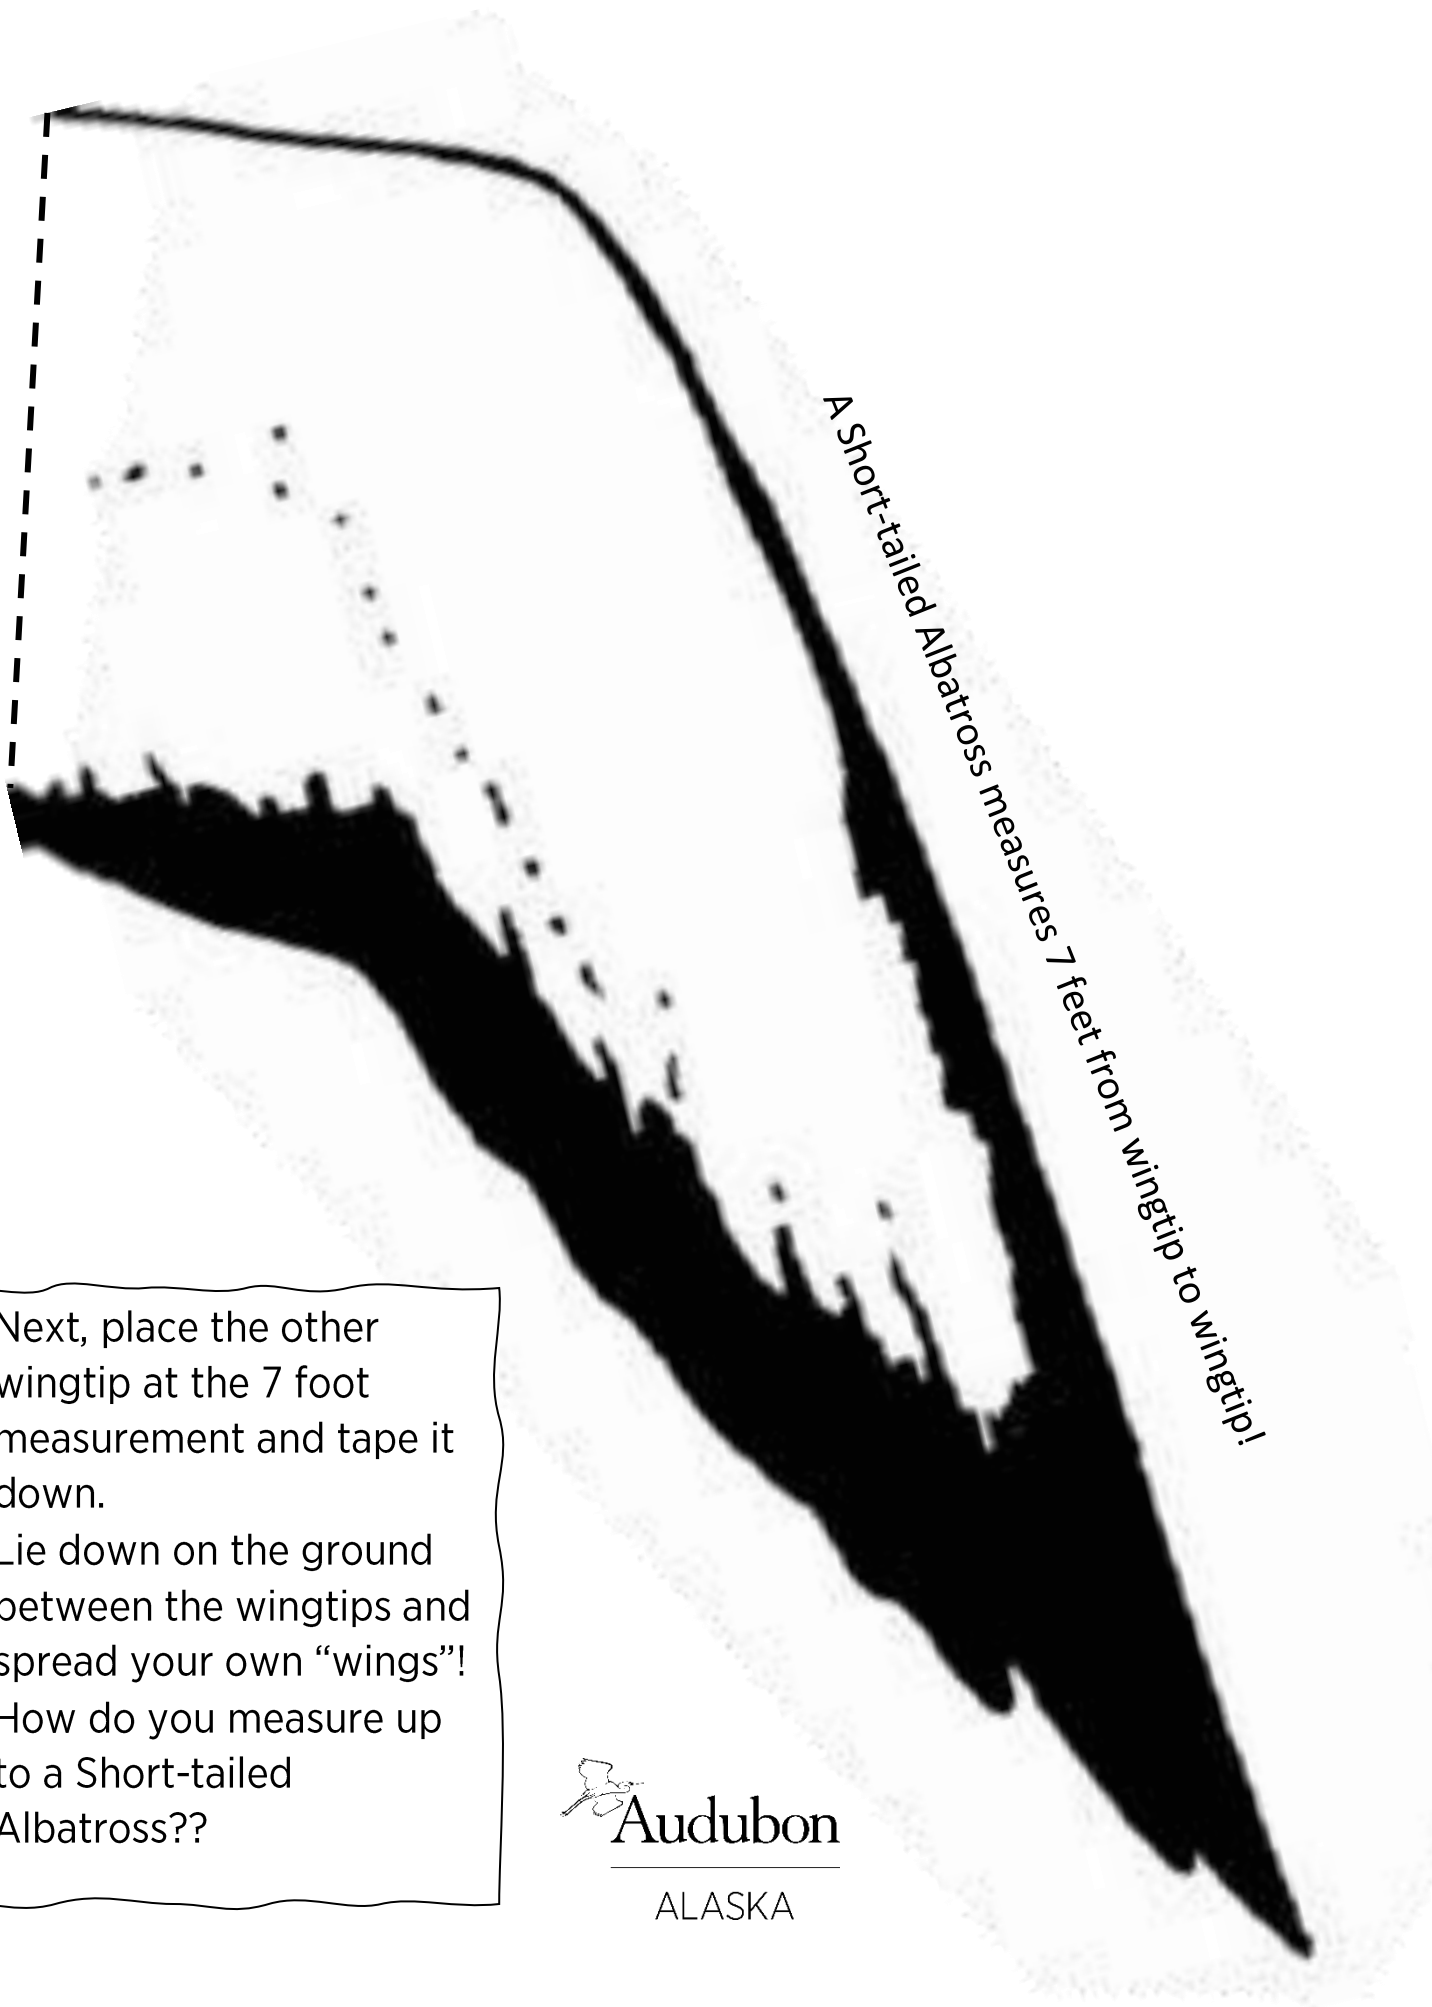

A Short-tailed Albatross measures 7 feet from wingtip to wingtip!

 Audubon

ALASKA

INSTRUCTIONS

- First, use scissors to cut out each wingtip.
- Next, tape one wingtip to the ground
- Then, measure from the first wingtip out to 7 feet.

- Next, place the other wingtip at the 7 foot measurement and tape it down.
- Lie down on the ground between the wingtips and spread your own “wings”!
- How do you measure up to a Short-tailed Albatross??
